DEFY THE CONVENTIONAL LIMITS OF FIT, PERFORMANCE, AND STYLE.

Octane FX

The Octane FX is a made-to-measure chair unlike any other. Imagine a chair so compact that you fold it up and store it in a suitcase, yet it is as lightweight and performance oriented as any rigid chair.

The Perfect Fit

Hand crafted to your specifications with precision to 5mm (.25"), the RGK Octane FX is an extension of your body, effortlessly moving with you around the tightest corners, up less-than-perfect curb cuts, and across rougher pavement. The Octane FX pushes your mobility to the next level, thanks to our Perfect Fit approach.

Revolutionary Q-Lock Folding System

The Q-Lock Folding System transforms a lightweight rigid chair into one that can fit into most airplane overhead luggage compartments and compact car trunks without compromising on rigidity – all while weighing in at less than 5.5 Kg* (12 lbs).

*Transport weight excluding wheels and cushion, and based on 400mm (15.75") rear seat width.

How it Comes Together is Why it Sits Apart

Exquisite materials greet your senses, and innovative design exceeds your expectations. The Open (mono-tube) folding frame design coupled with the industry's first CX6 Cast Carbon Fiber™ components by Spinergy® made exclusively for RGK, takes the Octane FX's performance and style to a whole new level.

Testimonial

"I didn't think I would be able to improve my seating position until I got into my new Octane FX. It fits me perfectly, and I feel so much more confident in myself. I never thought small changes would have such a big impact day to day. It's easier to push, lighter and now I can fold it up and take it everywhere! Plus it's so pretty... I honestly feel amazing in my Octane FX!"
