SUPINE TO PRONE IN ONE MOTION

EasyStand 

Zing

MPS, Supine, MPS TT(Tilt Table),
Supine TT(Tilt Table), Vertical, & Prone

The Zing line of multi and single position standers were designed to fit the widest range of children and accommodate positioning challenges few others can. The Zing line features independent leg abduction up to 30 degrees on each model. The units can be configured simply, with padded strapping system to ease transfers and aid multi-user environments. But when required, individual positioning and support components can be added.

The Zing

True Multi-Position Stander

- The MPS base allows three positions without changing pads, flipping foot plates or moving the tray
- Provides a smooth transition from a flat-to-load transfer to supine, vertical and 20 degrees prone
- Frame will only go supine and upright with Prone Position Lockout engaged

True Hip Pivot Leg Abduction

- Pivot points are in line with the hips, promoting proper alignment in the hips, knees and feet
- Feet maintain the angle with the rest of the legs - no wedges needed
- No need for abduction pad/pommel due to the innovative design
- Up to 30 degrees of abduction per leg
- Promotes musculoskeletal development for children during critical growth years

Plenty of Growth

- **Size 1:** Fits children from infancy to 44", and up to 70lbs
- **Size 2:** Fits children from 40-60", and up to 154lbs
- Can easily grow with the child and adapt to their changing needs
- Many supports, pads and straps are available in multiple sizes

Remarkably Modular

- Can be configured as a simple stander or fit a child with the most complex needs
- Designed to grow with the child – options can be added as needed
- Great for a multi-user facility or school

Advantage

Multi-Use Tray

- The MPS, Supine, MPS TT and Supine TT feature a multi-use tray that is angle adjustable and swings away either direction
- Tray can remain attached during transfers
- More activities are possible by swinging tray away during standing therapy

Unique Lift Mechanisms

- Dual controls are available allowing angle adjustment by foot pedal or hand control
- Gas Spring Lockout prevents an inadvertent change of position, especially important when around other children
- The Pow'r Up Lift option on Size 2 brings the user to the standing position with the touch of a button

Accommodating Contractures

- No special modifications are needed to accommodate children with contractures
- Using the multi-adjustable foot plates, multi-adjustable knee pads, and the independent calf pads, it is possible to adjust for contractures in one or both sides

Easy Adjustment

- Tool-free adjustment of all components
- Every adjustment can be made with a simple turn of a knob or ratchet handle

MPS (Multi-Position Stander)

The Zing MPS is the only multi-position stander that can seamlessly transition from supine to prone without having to transfer the child out and reposition foot plates, pads or trays.

supine

The Zing Supine features a comfortable 32" transfer height and provides all the positioning and support features of the MPS, minus prone.

MPS TT (Tilt Table)

The Zing MPS TT is identical to the MPS from a positioning standpoint, but features larger, wider support pads and options for padded strapping, that can simplify transferring and securing children.

Prone

The Zing Supine TT features the larger pads and padded strapping options of the MPS TT and positioning from flat to load supine to vertical.

The Zing Vertical is a single position stander that features a Padded Quick Strap to ease upright transfers. It's also one of the only vertical standers to offer anatomically correct independent leg abduction.

The Zing Prone is a single position stander but is one of the few to offer a flat-to-load transfer position at a comfortable height of 32". Prone positioning from 0-90 degrees.

MPS (Multi-Position Stander)

Supine

The Zing MPS is the only multi-position stander that can seamlessly transition from supine to prone without having to transfer the child out and reposition foot plates, pads or trays.

The Zing Supine features a comfortable 31" transfer height and provides all the positioning and support features of the MPS, minus prone.

The Zing MPS TT is identical to the MPS from a positioning standpoint, but features larger, wider support pads and options for padded strapping, that can simplify transferring and securing children.
