

Pro Elevating Leg Rest

Sizes for assemblies are based on seat width with straight frame; if Tilt chair has Offset Frame, add 2" to seat width. Seat to Footrest Length range for Short Extension is 10.5"-17.5" on Catalyst chairs and 8.5"-17" on tilt chairs. Seat to Footrest Length range for Long Extension is 13"-21" on Catalyst chairs and 11.5"-19" on tilt chairs. If chair was built with a fixed front frame or hangers were omitted, then latch blocks need to be ordered with ELRs. Please reference the "Front Frame" parts manual page for Catalyst chairs and the "Seat Frame" parts manual page for Focus, Flip, and Liberty chairs. If switching from a contracture footrest to an ELR, front seat tubes and latch blocks with hardware will be needed.

Distance between Point A and Point B
B = Footplate Length

NOTE: The yardstick on the top plane of the seat frame must lie flat against frame. The yardstick going from the footplate to the second yardstick must be square against the hanger tube.

Distance between Point A and Point B
B = Footplate Length

NOTE: The yardstick on the top plane of the seat frame must lie flat against frame. The yardstick going from the footplate to the second yardstick must be square against the front tube.

Distance between Point A and Point B
B = Footplate Length

NOTE: The yardstick on the top plane of the hanger must lie flat against hanger. The yardstick going from the footplate to the second yardstick must be square against the hanger tube.
